

Release Notes – 7.0c – GTO Filter / MQA / DSD256 (Sub-version)

Gibbs Transient Optimised Digital (GTO) Filter implemented – This replaces the Minimum Phase Filter.

Important

- All PCM LED colours will be the same colour due to GTO filter
- MAC:
 - USB C connections will not work for firmware updates, please use USB A
 - Mac firmware has been updated to work with Catalina OS onwards

Pros

- GTO filter which upsamples USB audio ([please read here for more information](#)).
- MQA
- DSD256 (Windows), DSD128 (Mac)
- 384kHz

Cons

- SPDIF output disabled (on USB to SPDIF capable units)
- No GTO for SPDIF signal
- No DSD512
- No 768kHz
